Software Developer with 7 months of internship experience in full-stack, passionate about web and mobile applications. I'm eager to learn new technologies to improve productivity and focus on understanding users, delivering software with great user experiences, and high quality. Continuous learning, problem-solving, and collaboration skills enable me to thrive in high-pressure environments and deliver satisfying outcomes.

## Education

**Khon Kaen University**

*Jun 2022 - Mar 2026*

Bachelor of Engineering in the Faculty of Engineering | Major: Computer Engineering

- Courses: Software Engineering, Web & Mobile Application, Data Science, Database, and Data Structures.
- GPA: 3.59

## Experience

**Playtorium Solutions | Software Developer Intern & Co-op**

*Apr 2025 - Oct 2025*

**Employee Self Service(PlayPeople) |** React, NestJS, PostgreSQL

- Migrated the **Node.js(Express)** backend to **NestJS** across 8 core modules, including RBAC, User Management, and Reporting, refactored the frontend to align with new API contracts, and resolved migration-related bugs, improving overall modularity, scalability, and security.
- Designed and developed a configurable Dynamic Form System end-to-end, from database design and seed data to backend API and frontend UI, replacing a manual email-based tax deduction process and enabling HR to update form structures and deduction rules as policies change with no code changes required.
- Designed and implemented an automated employee offboarding pipeline spanning **NestJS**, **n8n**, and **FastAPI** microservices, revoking access across **AWS IAM**, **GitLab**, **Jira**, and **MongoDB** with token-based auth, audit logging, and automated email notifications, significantly reducing manual offboarding effort.

## Projects

**Circulate |** Dart, Flutter, Firebase

*Nov 2024 - Mar 2025*

- Designed and developed an Android app for item exchange and donation, owning end-to-end from UI design to deployment, covering login with email/password and Google Sign-In, item feed, profile management, and dark/light theme switching.

**S-track |** Next.js, Node.js, Express, Firebase

*Jun 2024 - Oct 2024*

- Developed a responsive web-based storage management system featuring a calendar view for borrow/return tracking, club membership management, and an item borrowing request flow with full CRUD functionality.

## Technical Skills

**Programming Languages:** TypeScript, Java, Python, JavaScript, HTML, CSS, Dart, SQL

**Backend:** NestJS, FastAPI, Node.js (Express), Prisma, PostgreSQL, MySQL, MongoDB, Firebase

**Frontend:** React, Next.js, Flutter

**Cloud & Tools:** AWS, Docker, GitHub, GitLab, n8n, Postman, Swagger

## Achievements

**Thailand Cyber Top Talent 2024**

*Oct 2024*

- 7th Place Finalist (Senior Level), Strengthened skills in network traffic analysis, cryptography, and web vulnerability assessment, directly reinforcing secure coding practices applied in backend development.

**Blue Guardians CTF 2024**

*Sep 2024*

- 14th Place Finalist out of 300 participants, Competed in real-world Incident Response and Digital Forensics scenarios, analyzing attack logs to identify intrusion vectors.
